

## Optical Data Transport for Outdoor POE Devices

F-POE-G2

SKU: 145485    UPC: 817882024686

The white F-POE-G2 FiberPoE GEN2 from Ubiquiti Networks provides Gigabit bidirectional data transport between Ethernet and fiber optic cables. Additionally, it injects DC power to the Ethernet cable for passive PoE. This device can be used as a fiber to Ethernet converter, or as a fiber bridge with an additional FiberPoE GEN2 (available separately).

This device is equipped with a Gb/s SFP port, a DC terminal block, a DC RJ45 port, and a 1000M PoE port. It provides surge and ESD/EMP protection.

### Features:

- Provides reliable Gigabit PoE runs over long distances
- Data and power are transported on separate cables to improve data integrity and allow long cable runs
- Two FiberPoE GEN2 devices can be used as a fiber bridge, enabling users to utilize them as a fiber optic data link for protection from EMI events that can damage equipment or cause signal problems
- 24/50V passive PoE transport
- Integrated fiber cable strain relief provides additional protection and a cleaner installation
- LED indicators
- ESD/EMP protection
- Weatherproof design
- CE, FCC, and IC certified
