

2-Gang Power & Low Voltage Combo Box

LVDR2

SKU: 29495 UPC: 189970100016

LVDR2 Bracket Streamline and simplify your retrofit project with Arlingtons LVDR2. This box allows you to combine one electrical and one low-voltage run into a single location creating a clean look without any extra work. Designed for use with pre-existing construction this combo bracket uses flip-up wings to stay fixed against the drywall. The tightening screw is easily accessible from the front of the bracket and the wings can adjust to accommodate drywall paneling and other materials up to 1.5" in thickness. The power side of the LVDR2 includes a connector for Romex or other non-metallic electrical cables. On the low voltage side there are also knock-outs for conduit and raceway cable management covers- one " and one ". These UL-listed combination boxes come in a standard two-gang size and can fit a variety of split power and low voltage wall plates for installation convenience.

Basic Information:	
Part Number	LVDR2
Description	Power and Low Voltage Box for Existing Construction
UPC	018997010001
Unit Packaging	25pcs
Standard Packaging	25pcs
Country of Origin	
Listing
