

## RadioRA 3 All-in-One Processor with Mount

RR-PROC3-CW

SKU: 118727    UPC: 78427628573

### RadioRA 3 All-in-One Processor (includes ceiling and wall mounts)

The brain of the system that makes everything work based on your design, from the keypads to the timeclocks, to motion-sensor activated lights and more.

#### Features

- Required for client control of lights...App, schedules, scenes and other system programming
- Enables Lutron system integration with other leading connected brands including Control4, Savant, URC, Sonos, Amazon Alexa, Google Assistant, Apple Homekit and more
- Powered by PoE via CAT5e (or better) ethernet cable. Install the processor centrally in the home for optimal RF coverage with no more need for a power supply & nearby 120v outlet. Processor kit sold with PoE injector included.
- Backwards compatible to enable upgrade of existing RadioRA 2 & RA2 Select devices; some limitations apply.
- Convert existing RadioRA 2 programming to the new RadioRA 3 processor with 1-button
- Each processor controls up to 200 Lutron devices [up to 100 new RadioRA 3 devices (SUNNATA dimmers, keypads, switches) + 100 RadioRA 2 & RA2 Select compatible devices]
- New QuickFind software makes the processor easy to find and setup the processor on the home network
- Proprietary ClearConnect® RF technology for reliable, lightning-fast performance
- Coming soon: Pair two RA 3 processors to create 1 system of up to 400 devices
