## iotega Wireless Security & Automation Platform Kit

WS900-91LVZA

SKU: 19687    UPC: 80007767

iotega wireless security & automation platform kit. Includes one WS900 915Mhz control panel with built in 3G AT&T communicator, three PG9975 PowerG 915Mhz vanishing wireless door/window contacts and one PG9914 PowerG 915Mhz wireless PIR motion detector with Pet Immunity. Powered by SecureNet.

iotega is the next generation, all in-one smart security and home automation platform for residential and small commercial properties. It provides your customers with the security they already know and trust, along with the freedom to add smart home devices, according to their preferences. With iotega, you can generate revenue by providing your customers with the flexibility to start with a security-only package, and the scalability to upgrade to a full security and home automation solution. Customers get the peace-of-mind of easily monitoring their home or business remotely, regardless of how tech-savvy they are. Plus, you'll save time and money, with installations made simple using the latest innovations in wireless networking technology.
