

Conditioner Power HT 15 Amp

ELITE-15I

SKU: 26070 UPC: 654061027805

Furman ELITE-15I

Linear filtering AC power source.

For over 40 years, Furman has pioneered the development of AC power products for the most demanding audio, video, and broadcast professionals. Though the need for pristine AC power is nothing new, the Elite-15is technology and its unique implementation are revolutionary and without peer.

The extreme AC demands encountered in the professional audio/video arena have required technological developments far in excess of typical home theater/audiophile power products. In studios, live sound, and broadcast facilities, breakdown is unacceptable. Equipment failure or poor performance is costly. The same is true of todays home theater. Our solution based technology, extensive engineering expertise, and robust build quality have answered the challenge of todays corrupted power lines, and led to the creation of the Elite-15i.

Todays power lines are plagued with RF and EMI noise. When connecting sensitive equipment to your homes power outlet, AC noise couples into your systems critical components. This noise masks low level signals and cripples performance. Low level content is critical because it relays the crucial harmonics and ambiance in audio, as well as the depth and clarity in video. With Furmans exclusive Linear Filtering Technology, televisions, projectors, DVD players, amplifiers, and processors, are fed by linearly-filtered AC power. This dramatically reduces noise, ensuring consistent peak operation regardless of load conditions or the time of day. For the first time, you will see and hear your theater or audio system as it should be - uncompromised.

Another critical feature is our exclusive Series Multi-Stage Protection. This virtually maintenance-free surge suppression assures the highest level of AC protection possible, without sacrificing itself when the offending surge is severe - no damaged equipment, no service calls, no down time. Our digital AC voltage meter allows precise measurement of the incoming AC line voltage, (a valuable asset when monitoring systems that are connected to todays potentially poor power grids).

Further, our famous retractable front panel LED lamps allow easy viewing of either a rack or cabinet full of equipment, even when your theater lights are off.

The Elite-15i also features remote control capability via 12V triggering, compatible with the 12V triggering devices commonly found in power receivers and pre-amp processors. Additional products (such as a remote subwoofer) can be daisy-chained from the 12V output jack for an additional triggered unit. The 12V triggering feature may be bypassed if desired.

When employing the Elite-15i, you will notice far clearer, stunningly focused sound and visual images from your system. Video presentation will be crisp and colors true with greater gray and black scale definition, as well as noticeably improved depth and clarity. Many of the technological advances previously available only in our flagship Reference Conditioners are cornerstones of the Elite series. Now everyone can reap the benefits of unrivaled power purification and unequalled surge protection.

Features:

- Furman ELITE-15I Features at a Glance
- SMP provides the highest level of protection available
- LiFT significantly reduces AC line noise
- E.V.S. protects equipment from dangerous over-voltage conditions
- Zero ground contamination circuitry assures delivery of pure AC
- Two retractable, long-life, low-heat LED lights with dimmer for rack illumination
- 12 volt triggering for remote control
