

44 Space WR Series Roll Out Rack in Steel Enclosure, 42" Deep

WR-44-42

SKU: 12394 UPC: 65674710289

The Middle Atlantic WR-44-42 WR Series was designed to provide rear access for equipment even when the equipment bays are placed up against a wall or back to back. Factory-assembled in its own host enclosure, the rack frame pulls out and rotates for service access. Specify a WR Series enclosure when easy access to rear equipment connections is required for larger audio, video and security equipment installations but an access aisle is not practical.

Features

- Host enclosure can be pre-installed on-site
- Detachable rack frame can be integrated with equipment and tested off-site
- Requires no additional accessories to roll out and rotate
- Engineered ventilation is optimized for passive thermal management
- Rack frame features built-in cable management tie points
- 4" laser knockouts provided for cable pass-through and ganging multiple racks
- Standard front and rear 10-32 threaded rackrail with marked spaces
