

## Encrypted 345MHz Repeater

RPTR1e-345

SKU: 58739    UPC: 81708201343

The 2GIG 345MHz Encrypted Repeater is designed to work with 2GIG security systems providing more flexibility in where wireless sensors can be installed. The 2GIG Repeater can be installed in the optimal location to extend the range of 2GIG panels for large jobs. The 2GIG 345MHz Encrypted Repeater will repeat 2GIG and Honeywell sensor signals to 2GIG panels. The Repeater is a plug and play device that will immediately start repeating signals when powered on. The rechargeable battery provides backup power in case of AC power loss.

### Features

- Repeats 2GIG and Honeywell signals on 345MHz frequency
- 24-hour backup battery included
- Repeat indicator in the signal eliminates "repeated signal storm"
- Optional zone programming to supervise Tamper AC Loss and Low Battery
