

## Auxiliary Base Station for Complete Control or Total Control system

MRX-2

SKU: 17742    UPC: 656787122222

Versatile base station bridges the digital gap between the IP network and legacy components. It provides advanced connectivity for a broad range of components and devices, assuring seamless integration for optimal system performance.

### Features

- Auxiliary base station for Complete Control or Total Control system
- Receives commands from advanced system controller
- Reissues commands via IR, RS-232 or relay
- Offers advanced connectivity for broad range of components and devices
- Provides additional outputs for easy system expansion
- Note for Complete Control system: Install the MRX-2 independently and operate via Complete Control mobile app, KP-4000 or MX-5000
