## Internet Security Alarm Communicator

TL280RE

SKU: 19799    UPC: 80007557

The DSC TL280RE is an internet communicator that can be used with DSC's new Neo PowerSeries security systems. This will let your panel send signal to a central station monitoring service via the internet. This communicator uses 128-bit encryption and will give you piece of mind that your burglary signals are getting through to the central station receiving computer in a fast and secure manner.
