

## System Enhancement Module - AT&T

ADC-SEM300-VT-AT-M

SKU: 129169    UPC: 85003818634

Alarm.com ADC-SEM300-VT-VZ System Enhancement Module and IP Communicator is an upgraded version of the Alarm.com SEM210-VT communicator compatible with the Honeywell Vista10P, 15P, and 20P panels. This communicator allows signal transfer from your panel to Alarm.com and/or a central station, depending on your service plan.

The SEM supports the 4G LTE cellular network and optional Broadband Ethernet, ensuring the longest life cycle with the most secure and reliable service. The SEM is now ETL certified, ensuring a high benchmark of safety and sustainability.

### Features

- Fast, reliable, secure wireless signaling
- Home automation energy management
- Support for Z-Wave Plus devices
- Video monitoring
- No separate power supply needed
- Over the air (OTA) upgrades
- CID and SIA central station signaling
- Internal antennas
- Cover wall tamper included
- Externally facing LEDs for visual feedback
- Broadband as an optional secondary communication path
- Remote monitoring control via web/mobile
- Remote panel configurations with Uploader/Downloader, including Add Sensors
- Remote access and management of locally saved user codes
