## Nest Secure Alarm System Starter

H1500ES

SKU: 16435    UPC: 813917020500

The Nest Secure alarm system is easy to live with every day. Just tap Nest Tag on Nest Guard to arm and disarm the alarm - no passcode needed. Nest Detect sensors look out for doors, windows and rooms. And with the Nest app, you can keep an eye on what matters.

### Features

- Arm and disarm however you like  
Use the Nest app from anywhere, tap Nest Tag on Nest Guard or enter a passcode. Or just say, "Hey Google, set security to Away and guarding," and the built-in Google Assistant will arm for you.
- Get Remind Me alerts  
If you forget to arm your alarm, you can get a Remind Me alert on your phone so you can arm right from the Nest app.\*
- Look out for doors, windows and rooms  
Nest Detect is a sensor that does many things. Stick it on a window, and it detects open/close. Stick it on a wall, and it senses motion. On a door, it does both. With a built-in motion sensor, Nest Guard also protects a room.
- Open quietly  
Press the button on Nest Detect to open a door without setting off the alarm. The house stays armed and the alarm stays silent.
- It's easy for everyone  
Tap Nest Tag on Nest Guard to arm and disarm the alarm. Without a passcode. Put one on your keychain and give one to someone you trust.
- Know what's happening at home  
With the free Nest app, you can arm and disarm from anywhere. Check in on your home anytime. And if the alarm goes off, you'll get a security alert.
- Just ask Google.  
The built-in Google Assistant can help you manage tasks, get answers and control your home.

### Includes
