

NanoMax Door/Window Sensor Honeywell Compatible

RE222

SKU: 110768

Our most popular door/window sensor, and for good reason. NanoMax is tiny but powerful, with class-leading RF range.

NanoMax is the smallest full-featured security transmitter in the industry. It is typically used to sense opening and closings of doors and windows, but can secure just about anything using its Strip & Stick external contact holes. It will alarm when the magnet is pulled away from the NanoMax or when the external contact is opened.

Feature

- Low-profile and discreet
- Amazing RF range
- Up to 1-inch magnet gap
- Support for an external contact
- Peel and stick installation
- 6+ year battery life
- 5-year warranty

Models

- RE622 - Connect+
- RE122 - GE Compatible NanoMax
- RE222 - Honeywell Compatible NanoMax
