

IQ Hub PowerG (Verizon)

QS9301-0208-840

SKU: 110233

The Qolsys IQ Hub is the whole home hub with a 7" touchscreen. The glass made on the panel is made with capacitive multi-touch glass. Which is a transparent electrode layer that is placed on top of the glass panel, and covered by a protective cover. When a finger comes into contact with the screen, the ratios of the electrical currents change. That helps the computer to detect the touchpoints. Also in addition to the 7" screen, the panel also comes with a 2W speaker.
