

Encrypted Recessed Door / Window Sensor

DW20E-345

SKU: 23102 UPC: 9386314419

The 2GIG-DW20E-345 is a recessed, eSeries encrypted, wireless door and window contact that disappears in the shadow of the door or window frame, leaving intruders unaware of the protected entrance. This small frame sensor is so sensitive, that it can detect even the softest opening and closing of the entrances, making it a great option for enforcing curfew as well. The 2GIG-DW20E-345 communicates wirelessly with the 2GIG GC2e and GC3e control panels via the 345 MHz frequency. Powered by a replaceable three-volt lithium battery, the DW20E-345 sensor will last around five years with normal use.
