## PowerG Wireless Recessed Contact - Transparent

PG9307TR

SKU: 118547    UPC: 88030745

The Wireless PowerG Recessed Contact is a small but powerful device, uniquely designed to meet customers demands for discreet, yet reliable door and window protection. It can be easily embedded within the frame of a window or door. To make the contact even less noticeable, it has white or clear casing, flanges and cap. The flanges can be easily removed once installation is complete. Part of a complete end-to-end security solution, the contact is compatible with PowerSeries Neo and iotega security systems, and is ideal for both residential and light commercial use.

### Features

- Compact sensor is inserted into the side of the door, barely discernable once installed
- Ideal for residential and light commercial installations
- Clear flanges attached to the sensor blend in with the doorframe and enable near-invisible installation regardless of the doorframe's color.
- Flanges on the sensor casing can be easily snapped off, to further reduce visual impact
- White and brown adhesive covers (included) for the cap and magnet can be applied to match the door's surface
- Delivers exceptional value with a long-lasting battery (up to 10 years with typical use)
- Easily installed, with an ultra-thin magnet (0.08 in) that reduces the need for drilling
- Compatible with PowerSeries Neo, PowerSeries Pro and Qolsys panels
