

Video Balun - Passive HD Twisted Pair Transmitter

DS-1H18

SKU: 1569 UPC: 816783018367

The 2-pack of DS-1H18 Passive Video Baluns from Hikvision enable HD-TVI signal transmission over UTP cables in place of a coax cable. They deliver color signal transmission range up to 656. Before connecting a pair of UTP cable wires to a balun, ensure that they are the same color.

Passive video baluns capable of transmitting HD-TVI signals up to 656 over UTP cable

Features:

- Transmits TVI signal via UTP cable
- Passive High-Definition Transmitter
- No need to provide power. Plug and play, easy to maintain
- Installed directly with camera video output
- Spring compression wire terminals, for construction convenience
- Transmits Signal up to 656
- Transmission distance of color signal (via CAT 5 or CAT 6): up to 200 meters

Bandwidth	DC: 0 to 60 MHz
Impedance	75 to 100 Ohms
Differential Gain	<2%
Differential Phase	<2°
Transmission Distance	Up to 656' / 200 m
Connectors	BNC to spring compression wire terminals
Operating Temperature	-13 to 158°F / -25 to 70°C
Operating Humidity	<95%
Dimensions	2 x 0.55 x 0.63" / 51 x 14 x 16 mm
