Nest Thermostat Pro - Snow White

GA02180-US

SKU: 38630 UPC: 193575007731

Meet the Nest thermostat, the helpful thermostat with a cozy price. It can turn itself down to save energy when you leave the house. You can control it from anywhere with the Google home app – whether you're on an errand or on vacation. You can even change the temperature without getting off the couch or out of bed. Just say, "hey Google, turn up the heat". The Nest thermostat looks out for your heating or cooling system. If something doesn't seem right, it can send an alert. And it's easy to install yourself, usually in 30 minutes or less. Voice control with Google Assistant requires a compatible smart device.

Features

- Schedule your heating and cooling so it only works when it needs to.
- Savings Finder suggests more ways to save energy.
- The Nest Thermostat turns down the heating and cooling system when there's no one home.
- Monitors your heating and cooling system and alerts you if something isn't right.
- Makes maintenance easier by proactively sending reminders to change things like filters.
- Book an approved Pro right from the Google Home app and receive preferred pricing.
- See and adjust the temperature from anywhere using the Google Home app
- The Google Home app guides you through setting up a heating and cooling schedule.
- Control with your voice using a Nest speaker or display.
- All your data is encrypted for privacy. Use 2-Step verification to further improve your account security.
