PowerG Wireless Repeater

PG9920

SKU: 19760 UPC: 90105405784

The PG9920 PowerG Wireless Repeater significantly extends the communication range between the alarm system and other PowerG devices where the size of the building, layout or even materials of construction, require additional coverage.

With minimal installation time required and few holes to drill, the PG9920 Wireless Repeater reduces on-site time and increases productivity and revenue. The PG9920 is equipped with a visible signal quality LED indicator that lets the installer choose the optimal location for installation, eliminating the effort of going back and forth to the keypad.

Features

- Extends the overall wireless range
- LED indications for power failure, activity and installation performance diagnostics
