

Lightning Surge Protector with N-Female Connectors

859902

SKU: 30701 UPC: 81398600323

Boost the durability and performance of your cell phone signal booster systems with the Wilson 859902 Lightning Surge Protector. Ideal for setups involving outdoor antennas, this device offers numerous benefits.

Features

- **N-Female Connectors:** Ensures compatibility with 50 Ohm systems, providing a secure and efficient connection.
- **Frequency Range:** Operates effectively up to 3 GHz, with minimal signal attenuation of less than 0.2 dB, preserving signal integrity while offering surge protection.
- **Installation Requirements:** Requires an additional ground cable for effective functioning, emphasizing the importance of proper grounding for optimal surge protection.
- **Replaceable Component:** Includes a replaceable gas discharge element (part number 859920), which can be switched out if compromised by a surge, extending the protector's lifespan.
