

Four-Way Wide-Band Splitter with F-Female Connectors

850036

SKU: 30700 UPC: 81181502896

The Wilson Four-Way 700-2500 MHz 75 Ohm Splitter with F Female Connectors (850036) is designed to divide a single input signal into four outputs, each with F-Female connectors. This device is ideal for distributing signal efficiently in various installations.

Features

- **Frequency Range:** Operates across a wide frequency spectrum from 700 to 2500 MHz, suitable for various signal types.
- **Connector Type:** Equipped with F-Female connectors, ensuring compatibility with many cable types and enhancing installation flexibility.
- **Signal Splitting:** Efficiently splits a single input into four outputs, with each output experiencing a signal loss of -6 dB, a typical attenuation that helps manage signal strength across multiple outputs.
