## Universal Soundbar Mount

SASB1-B1

SKU: 25154    UPC: 793795531872

The SANUS SASB1 soundbar mount seamlessly integrates a soundbar with any mounted TV. Featuring broad compatibility, the soundbar mount attaches to the back or bottom of soundbars and works with most soundbars up to 20 lbs.

Post-install height adjustment creates an ideal fit between the soundbar and mounted TV. The included depth-adjustability allows the soundbar to be positioned flush with the bottom of the TV for a clean look and helps eliminate audio interference from upward-firing speakers.

Compatible with SANUS TV mounts and other UL listed mounts, the SANUS soundbar mount works with a large range of TV sizes and features broad VESA compatibility. When used with a full-motion TV mount, the soundbar mount allows your speaker to move with the TV for an optimal listening experience.

Installation is a brief, 15-minute process that requires only a screwdriver, and all necessary hardware is included in the box.

### Features

- Seamlessly integrates soundbar with mounted TV
- Attaches to back or bottom of soundbar for compatibility with most speakers up to 20 lbs.
- Post-install height adjustment for ideal fit between soundbar and mounted TV
- Depth adjustability allows perfect soundbar positioning for optimal audio performance
