10U AV Rack Stackable Open Frame Network Rack

CFR1610-B1

SKU: 39408 UPC: 793795535009

Use separately or with other racks

The Sanus CFR1610 stackable skeleton rack offers customizable storage for your component system. You can assemble the modular pieces in different ways, depending on what you need. Stack multiple 10U-rack-space CFR1610 frames together for more storage, or add onto a Sanus CFR1615 or CFR1620 component rack for more options.

The braces are self-aligning so you can easily fit the rack together without special tools. Slots in the braces let you wall-mount the rack for a more permanent storage solution. The rack ships flat with removable shelves and hardware needed for assembly. (If you're planning to wall-mount this rack, check out Sanus' swivel support mount.)

Features

- accommodates 10 rack spaces (1-3/4"H), or 5 shelved components (3-1/2"H)
- includes 2 CASH21 1U shelves
 - vented and backstopped
 - weight capacity 30 lbs. each
