

SONY

SA-SW5 Wireless Subwoofer for QUAD/Bar 9/Bar

SA-SW5

SKU: 149748 UPC: 027242922464

The SA-SW5 has a 7" woofer powered by a built-in 300-watt amplifier and a down-firing passive radiator. The woofer's design maximizes the magnetic force driving the voice coil for deeper, more powerful bass. This subwoofer gives you the extra boom you need to really *feel* your favorite movies and video games. It also works with compatible Sony A/V receivers for a convenient wireless subwoofer option.

The SA-SW5 connects to your sound bar wirelessly, so you don't need to run a signal cable across your floor. It's also wireless and compact, so it's not hard to find a nice spot for your sub. You can get started in less than a minute. Just plug into an AC outlet and turn the sub on. It will automatically pair up with the HT-A7000 or HT-A5000.

Features

- 300-watt built-in amplifier with Sigma Magnetic Circuit for powerful bass
- 7" woofer with down-firing passive radiator
- Wireless powered subwoofer for select Sony sound bars and receivers (sold separately)
