Arlington Drive Rings Quantity 50 DR2.

Arlington's new drive rings offer the fast, easy way to run electrical, SE, SEU and communications wire or cable on interior wood framing members or exterior walls. Made of corrosion-resistant galvanized steel, this series of drive rings provides sturdy support for wire and cable. Available in four sizes (measured inside the loop), they support a range of cable bundle sizes. The larger the drive ring, the more wire it holds. Installation is quick and easy. Use a hammer to attach the drive ring to the surface.
