Sony's feature-packed BRAVIA X93L is an excellent all-around choice for movies, sports, and shows. It delivers a crisp, bright picture thanks to its dense array of tiny LEDs, which are paired with Sony's XR Backlight Master Drive for incredibly precise light control and exceptional contrast. By dimming some areas of the screen and boosting others, Sony's XR Contrast Booster 15 delivers bright highlights, natural mid-tones, and deep blacks. It can also reduce "blooming" — or those pesky halos you sometimes see around bright objects on dark backgrounds.

The X93L also features Sony's X-Anti Reflection™ and X-Wide Angle™ technologies to help one enjoy a superb picture from any angle.
