

Beam Soundbar Mount

WSSBM1-B2

SKU: 20301 UPC: 793795533234

Mount your Sonos Beam directly under your mounted display with the black SANUS WSSBM1 Soundbar Mount. Designed for use specifically with the Sonos Beam it interfaces with your 37 to 70" display mount and holds the soundbar directly below your display whether on a tilt or swivel mount. The mount supports a variety of VESA patterns and provides up to 12" of height adjustment.

Features

- Designed to seamlessly integrated the Sonos Beam with your mounted display
- Allows the Sonos Beam to move along with your display whether on a tilt or full-motion mount
- Saves space by attaching the Beam directly to your display
- Smart Latch provides 12" of height adjustment with just the lift of a finger
- Broad VESA compatibility
- Custom designed for the Beam to help ensure optimal speaker performance and provide access to speaker ports
- Engineered for easy 15-minute installation with no drilling required
