Karbon Visions Wireless Optical Mouse K3468

Features

- Advanced Optical Tracking technology
- Improved LED light positioning makes this optical mouse more responsive and accurate.
- Advanced 2.4GHz wireless connection
- Wirelessly connects to the included Unifying nano-receiver, which plugs in to your USB port and works across an array of Unifying-compatible wireless devices.
- 3-button design, including the scroll wheel's tilt function
- The scroll wheel is ribbed for extra grip and includes a tilt function.
