

3-Zone Audio Streaming

A.3x

SKU: 61602

The new A.3x is packed with great features to echo music through your house or yacht seamlessly. Connect 3 zones of speakers to this amplifier and enjoy music with a 3x3x3 built-in audio matrix configuration. This allows one, two, or all three zones of speakers to play the same, or different music, instantly!

The VSSL A.3x is easy to use and easy to set up, eliminating the need for expensive technicians and reoccurring service charges for your audio system. We also offer free expert advice and tech support for the lifetime of your product.

We live in a world where streaming music is the most convenient way to enjoy the audio we love. But we don't just want to be restricted to listening to our streaming audio on our devices. The VSSL X Series brings you streaming music into your home. Finally, a product that allows you to stream your music from your favorite devices directly to your home speakers. The VSSL A.3x connects up to 3 zones to your home audio system giving you the freedom to use any app on any device to play any audio within those 3 zones. You can have three different devices listening to three different songs in three different zones, simultaneously, or enjoy the same song in all three zones at once.

VSSL has made it easier than ever to stream your music from any device using AirPlay 2 and Siri, Chromecast Built-in and the Google Assistant, Alexa Cast and Alexa, or Spotify Connect. Simply use the devices and apps you already know and use, no third-party apps needed. The X Series has made listening to the music you love even easier by integrating the power or voice control. Simply ask the Google Assistant, Alexa or Siri to play music to any zone. The VSSL X Series enables users to have multiple rooms playing in complete unison while others stream their own playlist.

Features

- With Native Streaming abilities, use any of your favorite apps to play music straight to desired audio zones. New music services are available immediately, no waiting for system updates.
- Zone control using any mobile device or tablet
