

## Digital Lock/Intercom 400 Mem

1504-081

SKU: 4838    UPC: 1504-081

Our DoorKing 1504-081 facility entry digital lighted keypad with intercom substation from North Shore Commercial Door can be used as a stand-alone entry system or with a Door King access controller. The intercom and lighted keypad are part of a single surface-mount unit that can be mounted to a wall or on a gooseneck mounting post. Connect the intercom substation to a master intercom station for voice communications.

This is a sturdy unit with a lighted metal keypad, stainless steel faceplate and weather-resistant steel cabinet. You can program PIN (personal identification number) codes from the keypad or a DoorKing smartphone app. The EEPROM memory won't lose programmed codes during power outages. Control access to your gated community, apartment complex, parking facility, commercial building or self-storage facility with this 400-code memory capacity unit.
