

# DENON

## Network Player with Ultra AL32 Processing

DNP-2000NE

SKU: 146221    UPC: 747192000000

### HIGHLIGHTS YOUR BENEFITS

- Universal playback of digital music files With HEOS® Built-in, connect to your home network to provide near-limitless streaming options.
- Playback nearly any digital audio format available from a USB drive.
- HDMI ARC Simple, single cable connection to your TV via HDMI ARC input. Also allows direct volume control from the television or amplifier remote.
- Ultra AL32 Processing Experience audio is beautifully faithful to the original sound. Ultra AL32 Processing algorithms restore information that was lost during digital recording.
- Quad DAC configuration Using a quad DAC configuration enables an improved, more powerful spatial expression of the soundstage, decreasing the low noise level and total harmonic distortion.
- USB-DAC USB-DAC input allows connection to a computer to access high-resolution audio files, supporting hi-res up to 11.2-MHz DSD and 384-kHz/32-bit PCM input signals.
- High-grade audio components All audio components have been carefully selected and optimized for the best sound quality.
- Isolation system DNP-2000NE's analog and digital circuit boards are isolated from each other. An independent power line from the transformer protects the analog circuit from interference and noise.
- Support for major voice control agents Enjoys effortless voice control from the leading voice agents. Speak commands with Amazon Alexa, Google Assistant, or Apple Siri. Switch between voice agents or pick a favorite

**Specifications** Add high-res streaming to your hi-fi system This cool, well-built piece from Denon lets you add high-res streaming to pretty much any existing audio system, but I might argue that it deserves the best hi-fi you can muster. The DNP-2000NE can play most digital audio sources "" including streaming music and your TV "" with clear, articulate sound. It also lets you sync with other compatible players on your home network for a house filled with music. HEOS's intuitive streaming and whole-house audio The DNP-2000NE features exceptional build-quality with isolated circuitry for clean sound with a minimum of interference and distortion. The DNP-2000NE's built-in HEOS multi-room streaming platform lets you play music from your choice of popular services like TIDAL, Spotify Connect, and Amazon Music HD (subscription may be required). You can also control sources connected to this streamer's digital inputs, as well as network-attached storage drives (NAS), with the HEOS app. And if you've got other Denon or Marantz components with HEOS Built-in, you can sync the music around your house. You can also simultaneously play different music on your different players, all from within the app. Robust construction with isolated circuitry I always appreciate how hefty Denon components feel in your hands, and the DNP-2000NE weighs in at just over 20 lbs. It's got well-designed isolated circuitry and an independent power supply that help keep noise from interference and distortion at a minimum. It also comes with a useful remote and has intuitive front-panel controls for when you want to listen without using your smartphone, tablet, or computer. AirPlay 2, Roon, and Bluetooth Apple users can connect to this player and sync with others in the AirPlay 2 ecosystem. And it will show up in your player list if you're using Roon, which also offers multi-room playback on compatible devices. And for another simple streaming option, Bluetooth gives you an easy and popular way to play music through this component. High-performance Quad DAC The quad DAC in this player gives streaming music a smooth, detailed presentation. To hear high-res audio tracks in all their glory, connect a computer to the rear-panel USB-B port or plug a thumb drive loaded with music into the front-panel Type-A port. Product highlights: network audio streamer and digital source preamp high-performance ESS Sabre ES9018K2M DAC robust construction with isolated circuitry reduces interference and distortion HEOS Built-in features include: wireless control of streaming music and sources connected to the DNP-2000NE and other components with HEOS Built-in multi-room wireless music with other HEOS components support for Spotify Connect, TIDAL, Amazon Music HD, and other popular music and
