2-Gang Low Voltage Mounting Bracket

K6220

SKU: 16321

Karbon A/V Single Gang Mounting Bracket K6220:

The Karbon A/V K6220 is a single-gang mounting bracket used for installations on existing construction. It acts as its own template to cut holes for phone cables, Cat5 Ethernet cables, coaxial video cables and other low-voltage wiring. Set the Karbon A/V K6220 Drywall Ring against your wallboard, drywall or panel, and trace a line. You then cut the line and install the bracket.

The Karbon A/V K6220 can be adjusted to wall thicknesses between ¼-inch and 1-inch, and has oval holes for shifting and straightening. Use it vertically or horizontally to install flush wall plates for all your wall boxes and cables. The non-metallic material costs less than metal brackets and meets UL standards.

Features

- Brackets adjust to fit various wall board thicknesses
- Bracket is its own template for cut out
- Horizontal or vertical mounting
- They install faster, cost less than metal brackets

Specifications: Mounting Bracket Low Voltage Non-Metallic For Communications, Cable Tv, Computer Wiring Cat 5 Listed Number of Gangs 2 Side Knockouts 0 Material of Construction PVC Characteristics: Non-Metallic, For Communications, Cable Tv, Computer Wiring, Cat 5 Listed, Bracket Is Its Own Template For Cut Out, Mounting Wings Hold Bracket Securely Against Wall When Screws Are Tightened.
