

Fiber Optic Coupler Duplex SC to SC

S2D-ADPT-SCSC

SKU: 23345 UPC: 816927000000

TechLogix Fiber optic coupler S2D-ADPT-SCSC. Fiber optic coupler -- duplex single mode OS2 SC to SC.

'Get out the cable stretcher!' This is a mildly humorous prank to play on a greenhorn cable installer, but sometimes, don't you wish you actually had one? Fiber couplers (sometimes called adapters) are a simple and stable way of extending your fiber optic cable, or creating a service point at a patch panel. These are also great for coupling your bulk fiber installation cable to a patch cable which will increase the longevity of the install cable.

Features

- Duplex SC to Duplex SC
- Single mode (OS2) compatible
- 29mm Panel Mount
- High precision ceramic sleeve
- Stainless steel clip
- For UPC polish type cables
- Low insertion loss $\leq 0.2\text{dB}$
