

BLUESOUND

## NODE Network Audio Player

N130WHTUNV

SKU: 110103    UPC: 786357000000

Enjoy audio from your local network, the internet, wired, or Bluetooth sources with the white Bluesound NODE Network Audio Player. It supports the playback of multiple file-formats over your network, wired or wirelessly, plus Bluetooth compatibility for pairing with your compatible smartphone or tablet; you can also output the audio via Bluetooth to your compatible wireless headphones or speakers. It is controllable via the BluOS Controller app or by your Amazon Alexa, Google Assistant, Siri, or various wired control ecosystems. An Ethernet cable and a stereo audio cable are included for instant connectivity. Bring 24-bit hi-res streaming to an existing stereo or to your powered speakers and access all the music ever recorded with a few taps of the BluOS Controller app for iOS, Android, or Mac or Windows computers. Hundreds of internet radio stations, premium music services like Tidal, Qobuz, Deezer, Spotify, and dozens of other music streaming services, are integrated with the NODE's operating system, making music discovery seamless and exciting. Don't let the size and minimalist looks of the NODE fool you into diminishing its capabilities. Inside, the NODE features an audiophile-grade DAC design that not only supports 24-bit/192 kHz audio processing, but also MQA for master quality listening. Along with powerful software features like tone controls and fixed volume output, you can customize your listening preferences in detail. Bring music into your NODE using HDMI eARC, Wi-Fi or Ethernet, Apple AirPlay 2, aptX HD Bluetooth, or USB, to hear audio content from streaming services, TV, and your own music library. Listen to your music through your Hi-Fi system or through wired or wireless headphones by connecting to the RCA, optical, aptX HD Bluetooth, 3.5mm jack, your Apple devices, or other Bluesound or BluOS players. Bit-perfect music listening can happen away from your Hi-Fi system with the NODE as your multi-room hub. The award-winning BluOS platform is the only platform in the world that can support up to 64 players, all streaming in 24-bit hi-res audio. With a growing stable of brands and devices being added to the BluOS platform, the NODE opens up a world of hi-res listening options throughout your home that no other player can. Quick access controls like play/pause, track skipping, and volume are available as touch panel controls at the top of the NODE, via voice assistants like Siri, Alexa, or the Google Assistant, or by programming your own IR remote or the optional Bluesound RC1. Advanced controls, including tone controls, subwoofer crossover optimization, and settings to enhance external DAC connections are available in the BluOS Controller app. The NODE can also be integrated into a smart home with full-feature drivers for Lutron, Elan, RTI, Crestron, and other popular home control systems. Seamlessly connect the NODE to multiple Bluesound speakers throughout the home with the BluOS Controller app and create an intuitive multi-room music system unlike any other.

### Features

- Proximity sensor
- Touch LEDs for play/pause, previous/next track, and preset buttons
- Touch slider LED for volume control
- Integrated 32-Bit, 384 kHz DAC
- Bluetooth 5.0 with aptX HD / AirPlay 2
- Works with BluOS Ecosystems
- USB Audio Playback

Supported Operating Systems Microsoft Windows Vista, 7 to 10 Apple macOS 10.10 to 10.15, 11 Supported File Formats Playback: MP3, AAC, WMA, WMA-L, OGG, ALAC, OPUS Hi-Res Audio Playback: FLAC, MQA, WAV, AIFF, MPEG-4 SLS Supported File Systems FAT32 Network File Sharing Server Message Block (SMB) DAC 32-Bit, 384 kHz Processor Quad-Core ARM CORTEX A53, 1.8 GHz Audio Performance Frequency Response Not Specified by Manufacturer Sampling Rates Native: Up to 192 kHz Bit Depth 16, 24 THD+N 0.002% Bluetooth Version 5.0 with aptX HD (2-Way Connectivity) Wi-Fi Dual-Band Wi-Fi 5 (802.11 a/b/g/n/ac) AirPlay Yes, AirPlay 2 Inputs 1 x HDMI eARC 1 x
