**Product Research**  
**Features**  
**Wireless Rear Speakers:** The SA-RS3S wireless rear speakers are designed specifically select Sony active soundbar speaker and Sony AV receivers. The SA-RS3S connects wirelessly to the soundbar speaker or AV receiver via 5.0 GHz RF. The wireless rear speakers provide your compatible Sony soundbar or AV receiver with dedicated left & right surround channels that enhance your home theater experience.  
**Compatible Soundbars:** HT-A7000, HT-A5000, HT-A3000, and HT-S2000  
**Compatible AV Receivers:** STR-AZ7000ES, STR-AZ5000ES, STR-AZ3000ES, STR-AZ1000ES, and STR-AN1000  
**Note:** Only one set of SA-RS3S wireless rear speaker can be connected to a compatible Sony soundbar or AV receiver.  
**Auto Connect:** The wireless rear speakers automatically connect to a compatible Sony soundbar speaker system when you power them up, so you can enjoy cinema-quality surround sound right away. Wireless connection to a compatible Sony AV receiver requires manual pairing.  
**2-Way Driver Design:** The Sony SA-RS3S wireless rear speakers feature a two-way driver design with a single soft-dome tweeter and one oval cone woofer to achieve rich sound and exceptional clarity. The drivers are housed in a bass reflex enclosure with a front-firing port.  
**S-Master Digital Amplifier:** Each wireless rear speaker employs a Sony designed S-Master digital amplifier rated at 50 watts for dynamic, clear sound with low distortion.  
**Mounting & Placement Options:** Each wireless powered rear speaker features a keyhole slot to mount the speakers flat against a wall (screws sold separately). Each speaker also features a M5 threaded insert for using with optional articulating wall-mount brackets (sold separately - see Accessories Tab). You can also simply mount the wireless powered rear speakers on stands (sold separately - see Accessories Tab) or shelves. The wireless rear speakers should be positioned behind or directly to the side of your main listening area. The speakers should be mounted a little bit above ear level when in your seated position. The wireless rear speakers can be positioned up to 30' from the soundbar.
