

Pre-Construction Back Box for IWS-10 In-Wall Subwoofer

IWB-10

SKU: 1829

The Monitor Audio In Wall Subwoofer IWB-10 is a sealed pre-construction back box, pre-wired with external terminals. Having an internal volume of 24 litres, the IWB-10 is designed to fit between standard 14 stud spacing and comes supplied with adjustable steel fixing brackets. While providing the ideal environment for the driver, the IWB-10 will also reduce the radiation of sound to adjacent rooms.

Features

- Designed to provide optimum performance for IWS-10
- Fits into standard 14 stud bays (16 centres)
- Heavy duty MDF construction
- Rugged laminated vinyl finish
- Pre-wired with external high quality push type terminals
