

Snap-on Automatic Water Shutoff Valve

8852000

SKU: 23315

The LeakSmart® Snap is an innovative home water shut-off valve controller that installs in a snap. Installs without tools onto your existing water main shut-off valve without any tools or the need to cut into pipes. Fits in any space and installs at any angle on any ball or gate valve. Programs itself to calibrate the torque required to turn off even the toughest water shut-off valve and adjusts if necessary. Works even if the Internet and power go out.

Features

- Supports Zigbee Networking
- Works with any ball or gate valve - even in tight spaces
- No tools required
- Fits a 3/4" and 1" pipe
- Quick connect wiring
- 100% protection with battery backup
- Industrial strength
- Integrates into Nest, Wink, Iris, Google Assistant, and Amazon Alexa
- 3 LED status lights
- Automatic 22-day cleaning cycle to prevent mineral build-up and ensures system check
- 5-year manufacturer's warranty
