

1x6 Basic Telecom

1267062-01-V1

SKU: 7299 UPC: 804428000000

Legrand 1x6 Basic Telecom Module 1267062-01-V1: Supports up to six telephone outlets, each with up to four lines. Directly interfaces to most security systems. For basic telephone, fax and modem service. 3"H x 6.5"W.

Features

- Cable pair isolation and testing capability for hassle-free installations.
- Quick installation with the patented On-Q mounting system.
- Supports optional On-Q Telecom Surge Protection Unit.
- Add additional telephone outlets simply and inexpensively with the On-Q Telecom Expansion Module.
- Supports most security systems by providing RJ-31x functionality through a multi-function switch and RJ45 jack.
- Half-width design facilitates easy positioning in the On-Q Enclosure with other On-Q modules.
- Supports up to four incoming telephone lines and distributes up to six telephone outlets with available expansion for increased capacity.
- Easy, high-quality cable termination on 110-style blocks.
