

7" Premium Three-Way In-Ceiling Speaker

70-RT

SKU: 23816 UPC: 747192000000

Broad coverage and dynamic, full-range performance from an extra deep well design with a Cassini oval woofer. Painted to match your Dacor, Vanishing Series built-in speakers blend in perfectly with their surroundings. Innovative features and patented Polk Audio technology in a discrete, easy-to-install package. Timbre-matched to the RTiA Series..This great-sounding speaker hides in plain sight! Polk's Vanishing Series 70-RT speakers stand out *audibly* not visually. Your favorite rooms don't have to be silent any longer just because you can't or don't want to put free-standing speakers there..Polk's clever design yields big bass from a smaller space. Polk ingenuity fills their Vanishing Series speakers to overflowing with clear, full-range sound. Each model has three drivers: a tweeter, a mid-range, and a woofer packed into a *smaller* than average space. Dual port bandpass technology ensures that you'll get deeper sound with a diminutive-sized speaker. Their paintable, seamless-profile magnetic grilles make it simple for these speakers to fit perfectly into your surroundings..Might as well invite the whole speaker family over! Get two 70-RTs to listen to music in the den, or add more for a great-sounding home theater. They're also a pretty close sonic match to Polk's renowned free-standing RTi speakers. Any way you choose, you'll get harmonious results. An optional in-ceiling bracket is recommended for installing the 70-RT speaker in a home with new construction.

Features

- sold individually
- frequency response 48-25,000 Hz (-3dB)
- three-way speaker design includes:
 - 3/4" silk/polymer dome tweeter
