

Sliding Volume Control

FG01653

SKU: 23254 UPC: 760514000000

Hear the music, not the volume controller

Niles volume controls deliver sound to your speakers without getting in the way of the music. While lesser components add pops, clicks and static, Niles brings you pure enjoyment. Their premium-quality parts and construction ensure high-fidelity sound with amplifiers rated at up to 100 watts per channel of continuous power.

These in-wall stereo volume controls offer intuitive operation for your multi-room audio system. The high-power, impedance-magnifying design lets you safely connect as many as eight controls and eight pairs of speakers to a typical receiver or amplifier without installing a speaker selector or any other type of protection device. The sliding control design provides an attractive, modern look.

If your amp's minimum impedance is 8 ohms, you can connect up to 8 pairs of 8-ohm speakers using these volume controls. If your amp's minimum impedance is 4 ohms, you can connect up to 16 pairs of 8 ohms speakers, or 8 pairs of 4 ohm speakers.

Features

- Connect up to 8 pairs of 8-ohm speakers to a single stereo amplifier (requires 1 volume control per speaker pair)
- Recommended for use with Niles speaker connecting block
- Adjustable impedance magnification (2x, 4x, and 8x)
- Power handling: 100 watts per channel
- 12 step control, 54dB maximum attenuation
- Pop-free switching between all steps
- Removable screwless connectors accommodate up to 16-gauge wire
- Decora-style wall plate and snap-on color insert for quick and easy color changes
 - includes: white, light almond, bone, and black wall plates
- Fits most 18-cubic-inch single-gang junction boxes at least 3" deep
- 2-15/16"W x 4-11/16"H (includes faceplate); depth behind plate: 2-9/16"
- UL-rated for safe in-wall installation
