Russound

In-Wall Touchscreen

XTS7

SKU: 129756   UPC: 612935000000

Russound's XTS in-wall touchscreen doesn't take its job lying down unless that is what the job calls for.

Thanks to a recent update, our popular XTS touchscreen -- an advanced, intuitive touchscreen control for Russound's XStream systems and MCA-Series Controllers -- now features a Landscape mode that allows it to be mounted horizontally in order to better accommodate a two-gang opening in any installation, especially those where the XTS is replacing a two-gang device.

In addition to Landscape mode, the control now includes a redesigned Settings Menu that simplifies access to audio controls and display options, a convenient new Room List button for intuitive room selection, and an updated Streaming Source Menu button that is a direct pathway to the menu for the streaming source currently selected.

What may be most important to consumers is how easy it is to use the XTS touchscreen, since it replicates the MyRussound app for full control of any zone in the system. Its elegant exterior is backed up by a powerful Cortex-A9 processor, which supports both gestures and multi-touch operation, with easy firmware upgrades as needed.

Full-color touchscreen control for Russound components

The Russound XTSPlus in-wall touchscreen gives you convenient, intuitive control over compatible Russound components. It can be installed in your wall in portrait or landscape orientation, for a clean, tech-savvy look that will impress visitors to your home or business. A 5" full-color display lets you see album cover art.

Compatible components:

- Russound MCA-66
- Russound MCA-88
- Russound MCA-88X
- Russound XSource Streaming Audio Player
- Russound XZone4
- Russound XZone 70V Streaming Mixer Amplifier
- Russound MBX-AMP streaming zone amplifier
- Russound MBX-PRE streaming preamplifier

Features

- full-color touchscreen control for select Russound media streamers
  - compatible with Russound MCA-66, MCA-88, MCA-88X, XSource, XZone4, and XZone70V
- 5" display screen
