## X-Large Recessed Articulating TV Wall Mount for 65" to 90" Panels

R600

SKU: 158382    UPC: 800153000000

Mount your large flat-screen TV flush to the wall with the **R600 Recessed In-Wall Articulating Mount for 65 to 90" TVs from Kanto Living**. The R600 features an in-wall box that mounts between 16" studs behind the screen to conceal the mount hardware. The in-wall compartment also provides knockouts to install AC outlets as well as integrated cable management, and enough extra space to house smaller AV components, such as streaming players and set top boxes. Additionally, an innovative, foldable new-construction template box allows contractors to run cables and put up drywall, while keeping the mount safe and scuff-free in its packaging until you're ready to install the TV.

Oversized In-Wall Box Store bulky TV breakout boxes, mini AV receivers, and cable set-top boxes behind your TV with R600's spacious in-wall box. An accessory plate allows easy access and removal of components for servicing. Perfect Placement Get your TV perfectly flush against the wall with the included 300x300 VESA plate, or dial in the perfect height and horizontal offset of your TV with the larger 800x600 interface. Contractor Friendly A foldable, in-wall template for new construction can be temporarily placed between studs letting contractors plan cabling and drywall while the mount sits safely in its packaging until needed. Power Where You Want Metal knockouts allow for the installation of power outlets inside the box so you can keep everything needed to power your equipment within the wall. Clean Cabling Metal cable management clips run along the length of the articulating arm while rubber grommets within the box help you to route your cabling without any mess. Additional Features

- 300x300 VESA patterns and smaller sit flush against the wall
- 400x400 VESA patterns and larger sit 1.1" from the wall
- Adjustable horizontal leveling
- In-wall box fits between 16" studs
