

## Universal Soundbar Adapter Kit

SBK00

SKU: 156319

# Product Description

The SBK00 Universal Sound Bar Adapter Kit is the premium choice for mounting the widest number of sound bar types on the market to *any* MantelMount pull-down or motorized bracket below your TV. Compatible with sound bars or center channel speakers that have mounting holes on the bottom or back, or even no holes at all, the SBK00 also offers great depth adjustments to assure you have the flushest Sound Bar-to-TV appearance possible!

### FEATURES:

- The SBK00 can be used in various configurations to accommodate the widest assortment of sound bars available on the market.
- The SBK00 is compatible with *all* MantelMount mounts.
- The SBK00 can be used with sound bars that have mounting holes on either the bottom or back of the sound bar as well as sound bars with no mounting holes at all.
- The SBK00 offers a depth adjustment feature that allows the front of most sound bars to be flush with the front of the TV screen if desired.
- The SBK00 includes 2 TV brace extenders to accommodate larger televisions with sound bars.
- The SBK00 offers the ability to fine tune the sound bars tilt for perfect alignment with the TV.

**INSTALLATION NOTES:**NOTE: The SBK00 is only meant for sound bar or channel speaker installations **BELOW** your TV. If you need to mount above your TV, please order our SBXL Above TV Sound Bar Adapter. NOTE: Since the SBK00 Sound Bar Adaptor Kit is designed to accommodate the widest range of TV's and sound bars, in most cases you will not use all the parts supplied with the kit.NOTE: If installing a sound bar on your MantelMount mount over a mantel, add another 1.5 inches of clearance between the bottom of sound bar and top of the shelf (mantel).NOTE: If installing with the RB100 Recess Box, only the Short Depth Support will be used. The Long Depth Support will not be used. NOTE: If using the RB100 Recess Box with our horizontal braces, the SBK00 depth adjustment brackets will not work.
