

BLUESOUND

Pulse MINI 2i

MINI 2i WIRELESS

SKU: 110110

The PULSE MINI 2i redefines what compact speakers can do by delivering a rich, dynamic performance no matter where you place it. The PULSE MINI 2i powered speaker takes decades of hifi audio legacy and squeezes it into a single box. Delivering rich and detailed sound, the PULSE MINI 2i can easily fit into small living spaces, all the while providing an outstanding high-res music streaming experience. The PULSE MINI 2i fits just about anywhere there's AC power. High-resolution audio playback in a small package that's the Bluesound PULSE MINI 2i. This compact speaker is ideal for a bookshelf, nightstand, or any place where space is at a premium. It's all set up for stereo sound from a single speaker, thanks to two 4" woofers and two 3/4" tweeters. Each driver is powered by its own amplifier for clear, detailed sound. You can make the PULSE MINI 2i part of a Bluesound multi-room wireless audio system and enjoy streaming high-resolution music from your digital library and music services. Built-in Apple AirPlay 2 technology lets you stream audio directly from your iPhone®, iPad®, or Mac® computer through your Bluesound system. That includes soundtracks from YouTube® videos and Netflix movies. And if you subscribe to Apple Music®, you can do even more. Use Siri on your iPhone, iPad, or Apple TV 4K to control Apple Music with voice commands. Tell it what selection or playlist to play and which Bluesound speakers or components you want it to play through. The PULSE MINI 2i features aptX® HD Bluetooth streaming for higher-fidelity sound with compatible Bluetooth devices. The system is backward-compatible with earlier forms of Bluetooth, too. You can even share that Bluetooth source with other Bluesound music players around your house that are connected to your network. And for convenient late-night listening, you can also stream wirelessly from the PULSE MINI 2i to a paired set of wireless headphones. Bluesound is compatible with virtually all digital music formats including high-resolution files up to 24-bit/192kHz. Access the music stored on your computer or a networked hard drive. Stream from internet radio stations and online services like Spotify®, Deezer, and TIDAL (including their high-res MQA service tier). You can also enjoy downloads from high-res music sites such as HDtracks. A USB input conveniently lets you play files "locally" from a flash drive or hard drive ideal when friends come over with their own music. The BlueOS controller app is a free download for both Apple® and Android devices. Select songs from your smartphone or tablet. The app displays all of your music services, internet radio stations, and digital music libraries stored on your computer or server. Play music in one room, all rooms, or different tracks in different spaces around your home through BluOS-compatible speakers and players.

Features

- An innovative dual acoustic chamber results in a stunning, size-defying performance.
- Experience deep bass and full-range sound free from distortion.
- Dual-band Wi-Fi and support for 2-way Bluetooth aptX HD ensures music playback without interruption.
- Group two PULSE MINI 2i's together for a seamless stereo pairing.
- Designed to fit seamlessly into your home decor.
- Control music wirelessly with the intuitive BluOS Controller app for iOS, Android, Kindle Fire, and Windows & Mac OS X desktops.
- Control it with the optional Bluesound RC1 Remote Controller
- Connect Bluesound to your Amazon Echo with the skill in the Alexa app and use Amazon's Alexa voice assistant to control Players around the home.
- AirPlay 2 lets you play music or podcasts from wireless speakers throughout your house all in sync.
