

2MP / 1080P WiFi Video Doorbell Camera

DINGER

SKU: 66534

DINGER

If you have been looking for the best Wi-Fi doorbell camera to keep an eye on your personal reality, IC Realtime Dash Dinger is the perfect answer. Dash Dinger's advanced features make it the best wireless security camera for your porch or entryway.

PRO-LEVEL PRIVACY & SECURITY

IC Realtime is all about security, and privacy is a concern with every network device inside your home, so all Dash cameras employ multiple levels of password & signal encryption at every step. These device-level barriers work hand in hand with those of your internet provider and Dash cloud servers. IC Realtime will not harvest or share any personal data with 3rd parties - we are dedicated to keeping your personal reality truly personal.

1080P HD WIDE ANGLE VIDEO

Dash Dinger is not just another consumer-level low-res (webcam) Wi-Fi doorbell camera. It is a professional-grade, 1080p HD video security camera with a super wide-angle 1.8mm lens for a 140° field of view, carefully engineered to fit into an electronic doorbell.

PROTECT YOUR PERSONAL REALITY

Dash series Wi-Fi home security cameras to make it easy to watch over and protect the people and things you love - what we call your personal reality - no matter where you are using the free ICView or Dash phone app. The Dash Dinger serves up next-generation features like built-in 2-way audio with speakerphone quality and powerful 2.4ghz Wi-Fi. Instead of just standard camera-based motion detection, Dash Dinger's instant phone notifications are based on advanced passive infrared "Human Detection" to reduce false alarms up to 90%.

THE BEST VIDEO DOORBELL OUT THERE

Dash Dinger has no batteries to recharge and is designed with wide 12-24V DC or AC power capability to use existing doorbell power wires. Unlike less sophisticated, battery-powered doorbell cams, Dinger can stream 1080p video to multiple recording destinations and makes it compatible with IC Realtime's professional IP video recorders for easy, secure home video security & automation system integration.

COMMERCIAL-GRADE VIDEO OPTIONS

Dash Dinger can stream to an on-site or remote IC Realtime Network Video Recorder for an unlimited record time, or off-site to our super-affordable DASH cloud service for up to 30 days of video & alert reviews, or onto its built-in SD card slot for up to 5 hours of in-device stored video.

If you have been waiting for a professional but easy-to-use Wi-Fi doorbell camera that plays well with other IC Real-time recording systems, your wait is over: Dash Dinger is the answer. Visit store.icrealtime.com/series/dash to see the complete line of Dash products.
