Pro Series X-Large Articulating TV Wall Mount for 42" to 100" Panels

PMX700

SKU: 32014 UPC: 800153000000

Don't let the size of your TV dictate where you put it. Capable of supporting TVs up to 100", the PMX700 features two articulating arms that can be horizontally offset to give you the utmost discretion over where your TV is placed. With 31.3" of extension, this full motion wall mount provides enough tilt and swivel movement to ensure you always have the perfect viewing angle. Its low profile design allows your TV to sit 2.6" from the wall when fully retracted and features cable management clips to keep your cables out of sight. The PMX700's solid steel frame safely holds up to 150 lb (68 kg), even at full extension. Center your TV on the wall regardless of where your studs are located by adjusting the PMX700's arm assembly 11" (27.9 cm) left or right. The unique design of the PMX700 allows your TV to sit 2.6 inches from the wall when fully pushed in. Easily reach over fireplaces or out of recessed locations with 31.3 (79.5 cm) of extension. Effortlessly tilt your TV 12° forward or 3° backward with the PMX700's newly designed toolless tilt mechanism. Maintain a clean, finished appearance while hiding any sign of installation with the PDX700's aluminum wall plate covers. Achieve the best viewing angle regardless of where you're sitting by swivelling your TV up to 90 degrees left or right, depending on screen size. Four cable management raceways located on the bottom of each arm help to keep your viewing area tidy. Because every installation is unique, the PMX700 is carefully packaged with all the hardware you could need. Choose between a variety of bolt diameters and lengths, as well as several spacers to perfectly fit your TV. Lag bolts and concrete anchors are also provided for both wood studs and concrete walls.
