

7-Channel 60 Watt AV Surround Sound Receiver

T 758 V3i

SKU: 110169 UPC: 786357000000

NAD's T758 V3i is a performance update to their award-winning T758 A/V Surround Sound Receiver and continues the simple is better™ design philosophy. The T 758 V3i is anything but a stripped-down offering, using advanced technology and apps to make your smartphone a remote control for your NAD system. From lifelike surround sound performance to heart-thumping power to reach-out-and-touch-it 4K video, the T 758 V3i is a treat for your senses!

Popular surround sound formats, including HD formats Dolby Atmos® and DTS Master Audio, are decoded using the latest generation of high-speed multi-core DSP. With full support for High Res Audio formats like MQA (Master Quality Authenticated) included in the BluOS® Player, the T 758 V3i is unique. Add to this NAD's exclusive PowerDrive amplifier featuring high current combined with high Dynamic Power to bring out the very best in any speaker you may choose for your home theatre. With both music and movies, the T 758 V3i's award-winning heritage reveals its power with immense depth, clarity, and incredible detail. Ordinary AV receivers simply sound flat in comparison.

The T 758 V3i offers killer performance with the latest digital video technology, including UltraHD video at resolutions up to 3840 x 2160 pixels at 60 frames per second with 4:4:4 color gamut and High Dynamic Range support. Analog video sources are also supported on HDMI for simple one wire™ connection to your flat screen or projector. NAD leaves the video processing where it belongs, in your display, avoiding multiple format conversions that plague lesser AVRs. It also includes popular HDMI features, Audio Return Channel (ARC) and Consumer Electronic Control (CEC).

NAD has created a very simple user interface that is incredibly flexible but very easy to use. Each source component retains the same custom settings every time it is selected for viewing, and there are no empty inputs™ to clutter or confuse. In addition, powerful AV Presets allow custom setups for different types of program material (drama, action, musical, etc.) tailoring the performance to your taste. Inputs can even be renamed to match your particular components. A second independent zone is included and can be powered by the internal back channel amplifiers. Advanced multi-room systems are easily accommodated thanks to its full suite of connections for home automation systems. The T 758 V3i is more flexible than ever, with AirPlay 2 built-in for easy integration into the Apple ecosystem.

Features

- 7 x 60W into 8 Ohms, all channels driven simultaneously
- FTC 110W (8 Ohms within rated distortion)
- Modular Design Construction (MDC) and includes AM 230 Audio Module and VM 130i Video Module
- HDMI® (3 in / 1 out) 4K Ultra HD Full Support with 4K/60p / 4:4:4 / HDCP 2.2
- AirPlay 2 Integration
- Supports Siri Voice Assistant via AirPlay 2
- Dolby Atmos® and DTS HD Master Audio support
- BluOS Enabled for wireless multi-room music streaming (upgrade kit included)
- Hi-Res Audio playback including 24-bit/192kHz FLAC / WAV / AIFF
- 5 Custom A/V Presets
- Independent source and volume controls for Zone 2
- RS-232 Port Interface for Advanced Control Systems

Eco-friendly operation with <0.5W standby power consumption
Complete with Dirac Live® Software and Calibrated Microphone
