

Jamo

10" In-Wall Passive Subwoofer

SW IW 1060 SW

SKU: 23906 UPC: 8634940358

Not all of our speakers make a strong visual statement. The IW 1060 SW is an in-wall passive subwoofer that provides remarkable bass enhancement and accurate reproduction of deep bass notes, without demanding a dominating presence in the room. The IW 1060 SW provides extra boost in a high-quality music or home theater system without the need for a visible subwoofer. The multi-purpose amplifiers MPA-101 or MPA-201 are the ideal choice for amplification of this 10-inch passive subwoofer. Jamo's in-wall and in-ceiling speakers combine toughness with truly premium sound. The IW 1060 SW design features a 10-inch woofer for accurate reproduction of the deepest bass notes.

Features

- A crossover that directs higher frequencies to the satellites for box-speaker sound and performance
