

Encrypted 4-Button Keyfob Remote

KEY2E-345

SKU: 23103 UPC: 9386314415

The 2GIG Encrypted 4-Button Keyfob Remote communicates with the 2GIG Control Panel on the 345 MHz frequency. It gives users the ability to turn the security system ON and OFF before entering the home or after exiting. If there is an emergency, you can turn on the siren and automatically call the central monitoring station. Keyfobs can be programmed to operate the programmable output in the Control Panel. Use with the 2GIG Universal Garage Door Receiver (2GIG?GDR1e?345) to open a garage door. The keyfob is a lithium coin battery-powered, wireless keyfob designed to fit on a key chain, in a pocket, or in a purse.

Features

- Encrypted Protocol for Enhanced Security
- Arms system in STAY or AWAY mode
- Disarms system
- Auxiliary output and emergency functions
- Lithium coin battery with 5 years life
