

Loose Cable Stapler

45001

SKU: 156332

Klein Tools' Cable Stapler drives insulated staples for Romex® and data cables with one hand. It features a forward action handle for greater stability, which allows user to push the handle, rather than squeeze, delivering easy, consistent performance. Staples are released from the front of stapler, nearest to where the handle is pressed down. A cable guide along the entire bottom surface protects the cable during the stapling process. Use only with Klein staples (sold separately).

Features

- Loose Cable Stapler secures Romex® and data cables
- Forward action handle presses directly over nose, for greater stability
- Premium cast aluminum body
- Cable channel on mounting face protects cables
- Belt clip can be mounted to either side of stapler
- Works solely with Klein Tools staples (Cat. Nos. 450-003 and 450-004)
- Insulated staples easily load on non-removable magazine
