Mini Larry 500 Flashlight

NEB-POC-1004

SKU: 151562 UPC: 645398000000

For fans of the legendary Big Larry series, there is now a pocketable and rechargeable version to add to your collection! NEBO® has taken the core elements of the Big Larry and designed a pocketable, 2-in-1 flashlight and work light that is nearly half the size and weight of the original.

The Mini Larry is the pocket light you reach for when you need versatility. Designed with a 500 lumen LED flashlight, a 450 lumen C•O•B work light and 4 light modes, it easily adapts to any situation from spotlighting to area task lighting. Engineered for industry-leading brightness, C•O•B LED chip technology provides brilliant illumination while offering improved energy efficiency over standard LEDs. The powerful magnetic base allows you to mount the light to any metal surface for convenient, hands-free lighting.

The aircraft-grade aluminum construction is impact-resistant, so it is designed to last with a bezel to protect the recessed LED and a rubber work light cover to prevent cracking, if dropped. The sturdy, steel clip allows you to easily carry this light on a belt or a pocket. Alternatively, the clip can be reversed for use as a cap light or removed for a slimmer profile. NEBO's proprietary Smart Power Control™ creates a seamless transition through light modes to extend battery life and it is fully rechargeable via the integrated USB-C port.
